

OCTOPUS

WEIRD BUT TRUE!

An octopus has three hearts.
Octopuses prefer walking on the seafloor instead of swimming.
Octopuses don't have bones and can squeeze themselves into tiny places.

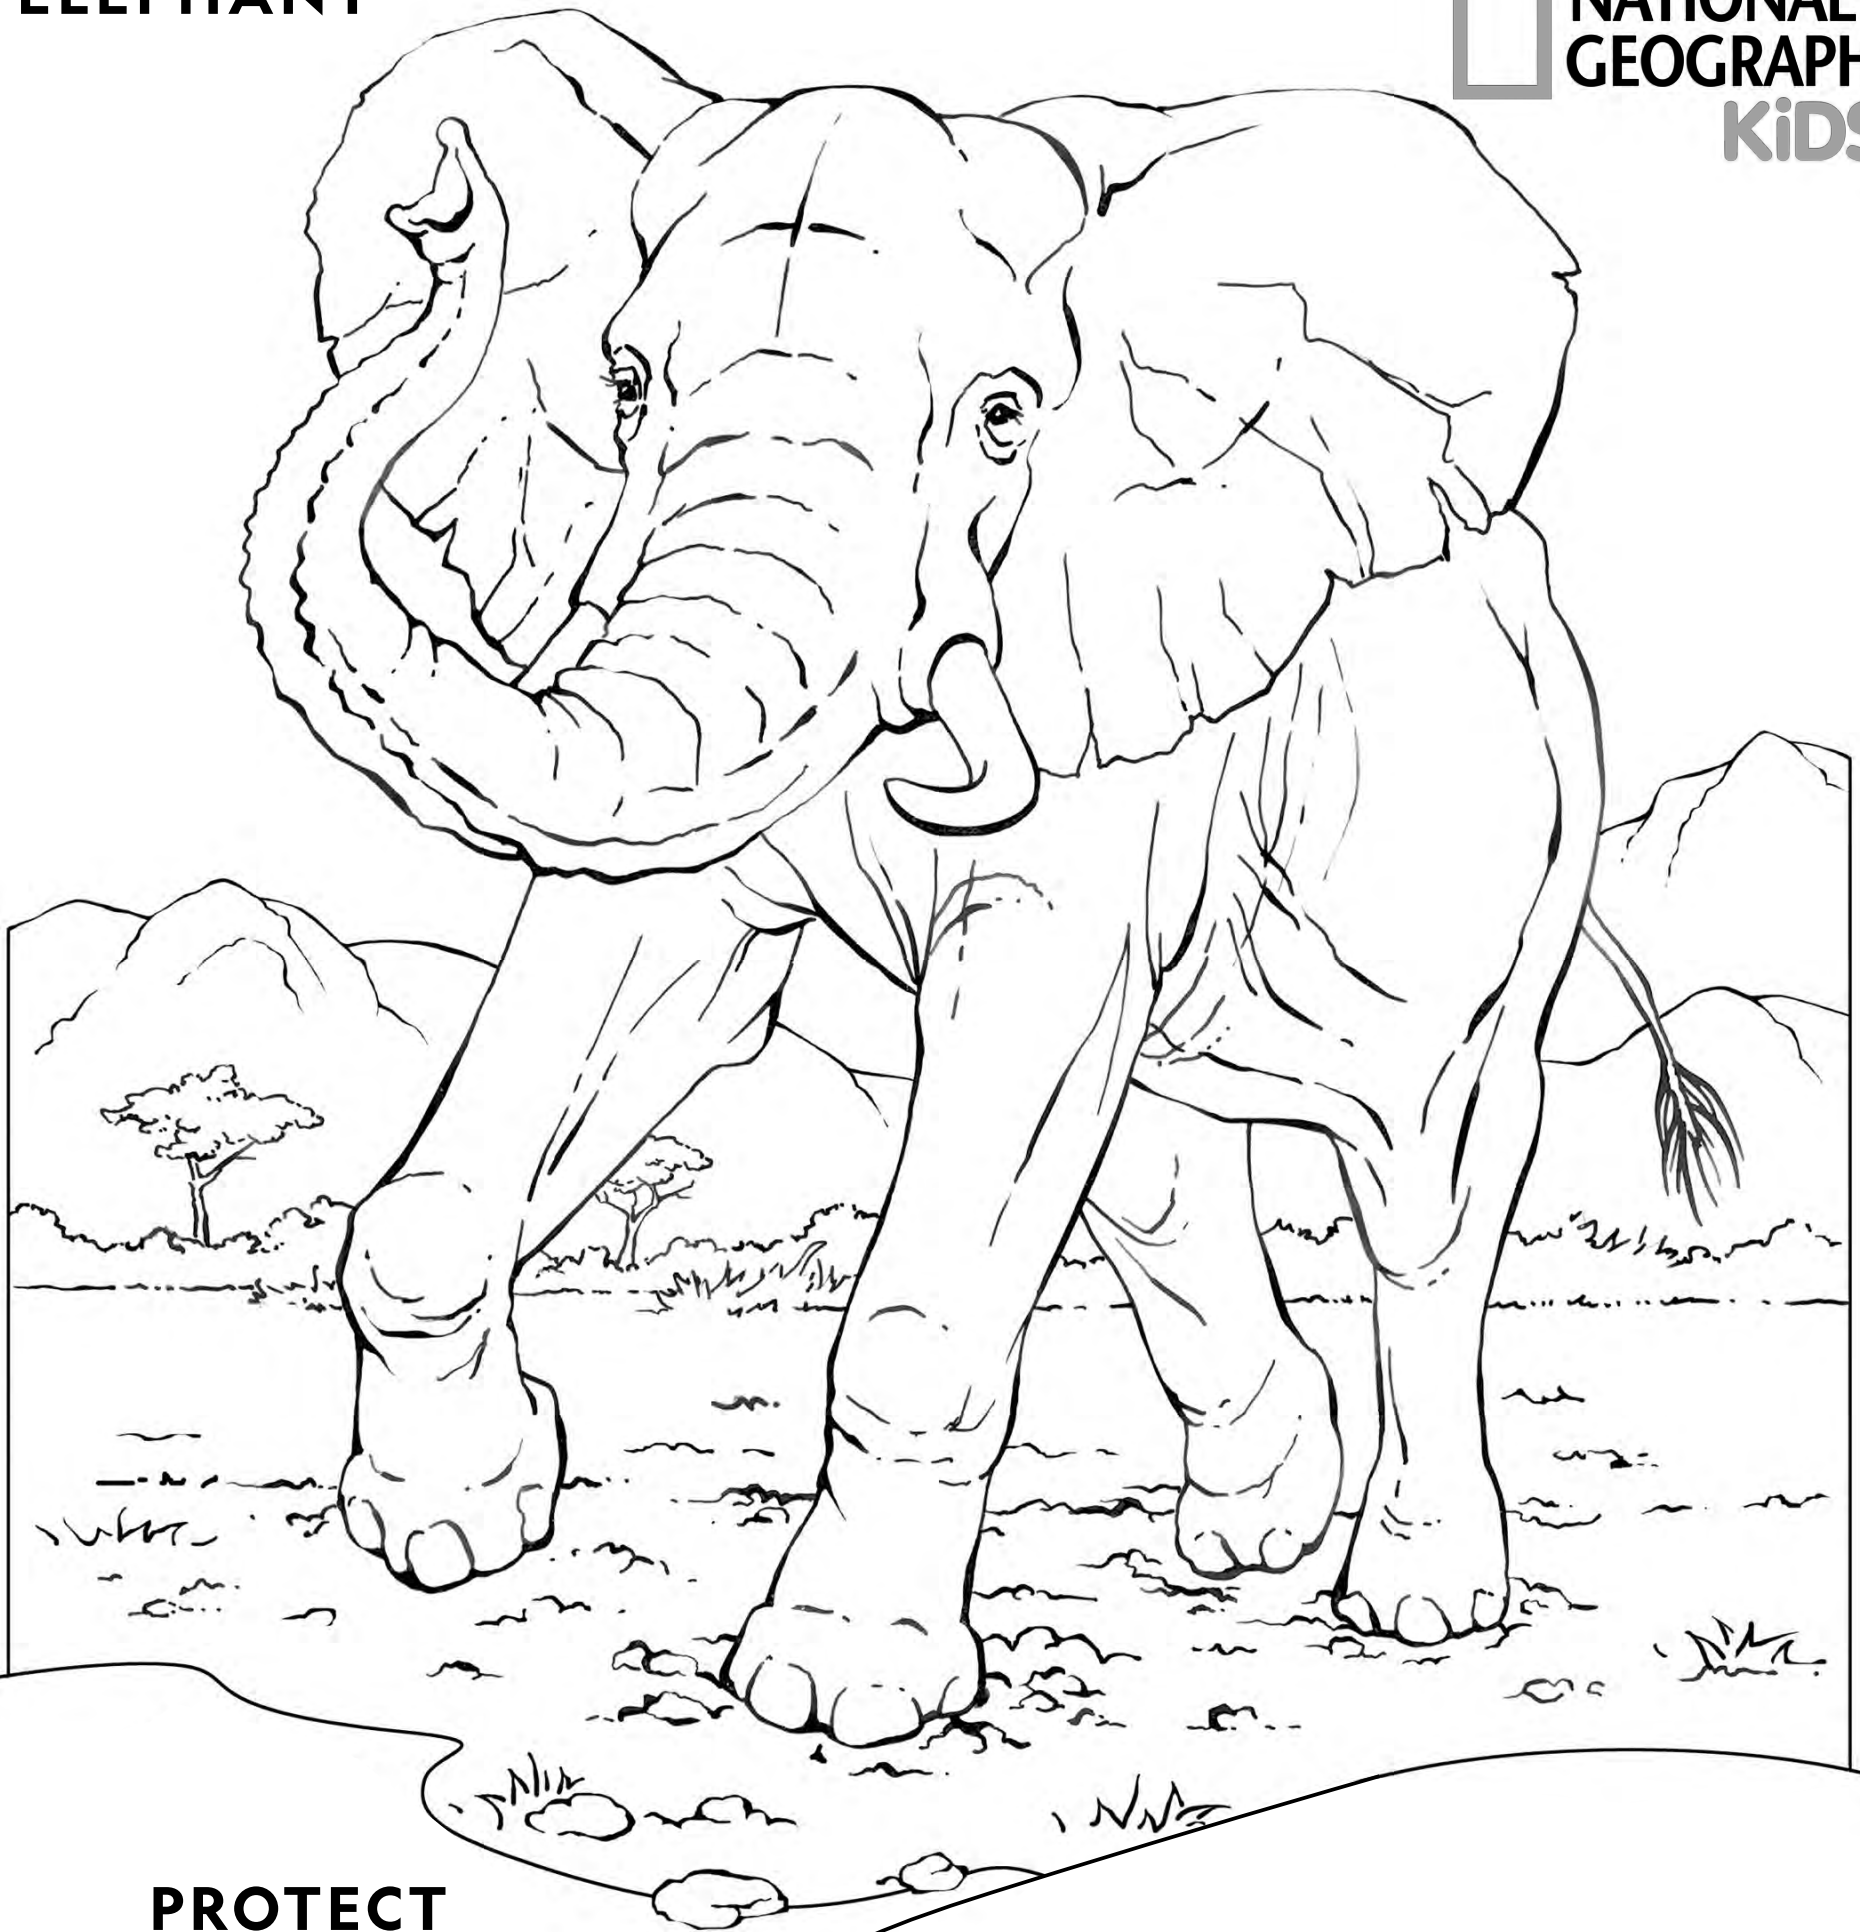

PROTECT OCTOPUSES

Choose a lake or creek near you and help keep it clean. Trash in waterways can flow into the ocean and hurt habitats where octopuses live.

Secrets of the Octopus is on Disney+.

ELEPHANT

PROTECT ELEPHANTS

Host a lemonade stand or bake sale, then donate the money to an organization that protects these creatures.

WEIRD BUT TRUE!

Elephants use their trunks to hug each other.

A newborn African elephant can weigh 200 pounds.

Elephant moms cover their young in a "sunscreen" of dust and mud.

LION

WEIRD BUT TRUE!

Lions rest about
20 hours a day.

In a lion pride, females do
most of the hunting.

A lion's roar can be heard
from five miles away.

PROTECT LIONS

Don't visit attractions
that allow you to hold
baby big cats. Many
places that allow tourists
to handle these animals
likely mistreat the cats.

MONARCH BUTTERFLY

WEIRD BUT TRUE!

To save energy, monarch butterflies soar like hang gliders.

It takes 9 to 15 days for a monarch caterpillar to turn into a butterfly.

Monarchs drink nectar from flowers with a long tongue it uses like a straw.

PROTECT MONARCHS

Help your parents plant milkweed in your yard to attract these pollinators to a safe place to lay eggs.

A Real Bug's Life is on Disney+.
